

ELECTRO-MECHANICAL INDUSTRIES, INC.
13300 6th Avenue North
Plymouth, MN 55441

Mechanical Engineering Lead

Are you a well-organized, mechanically inclined, problem solving individual with experience in a manufacturing environment? Then consider applying for the Mechanical Engineering Lead with Electro-Mechanical Industries, Inc. (EMI), a family owned, custom manufacturer of electrical power distribution equipment located in Plymouth, MN. The company, with 36 years of steady growth and product innovation, provides products and services to commercial and industrial customers throughout the US and Canada.

The Mechanical Engineer Lead position will provide guidance in design, development, optimization and problem solving of custom engineering/manufacturing company. Candidates must have expertise across multiple technologies and will have a demonstrated ability to effectively interface with a broad range of internal and external team members. This person will report to the Director of Operations and/or Engineering Manager in the form of broad and specific project objectives and daily accountability meetings.

Qualifications/Education/Experience Preferred:

- Candidates with a Bachelor's or advanced degree in Mechanical Engineering are preferred. Materials or Mechanical Engineering Technology from an accredited college or university as well as a minimum of five years of experience in a variety of technical or operational environments will be considered. Candidates with an Associate, Bachelor, or advanced degree in a relevant scientific discipline(s) in addition to applicable business acumen may also be considered.
- A demonstrated ability to work both independently and lead a team to complete projects that are accurate and within required timeframes.
- Understands the importance of documentation and configuration control requirements.
- Collaborative Leadership style with the ability to improve teamwork and finished results.
- Proficient with current industry trend such as: CAD technologies, 3D Modeling, Macro-programming and Parametric Design

Desired Qualifications:

- Strong knowledge and background in custom engineering/manufacturing including a demonstrated ability to translate that knowledge into execution of process and capacity improvements in major capital projects.
- Up to eight years of experience in a variety of manufacturing and staff assignments, including maintenance and operations.
- Experience working with external technical service suppliers.

To apply for this position, send your resume and salary requirements to: Radhika Page @ rpage@e-m-i.com. EMI is an equal opportunity employer.
